Regional Cooperation for Sustainable Energy and Climate Action
Promote sustainable energy markets, industries and innovation

Pradeep Monga, UNIDO, Energy Department
Objectives of regional cooperation

- Promote the creation of regional sustainable energy markets, industries and innovation through economies of scale
- Address common barriers more (cost) effective through regional exchange, approaches and methodologies
- Strengthen regional and national capacities to implement policies and targets (e.g. INDCs) as well as climate finance
- Need for platforms for south-south, triangular partnerships and the private sector
- Strengthen donor harmonisation and alignment
- Address the „missing link“ between international energy and climate commitments and implementation on national level
UNIDO supports regional organizations in the creation and operation of renewable energy and energy efficiency centres

- Sub-Network Africa
- Sub-Network for SIDS – SAMOA Pathway Partnership
- New centre in Central America
- New centre in Himalaya-Hindukush
Adopted by more than 89 Ministers of Energy!
Accelerate and complement national efforts through regional interventions
Thank you!
