<table>
<thead>
<tr>
<th>Universal access to modern energy services</th>
<th>Doubling global improvement of energy efficiency</th>
<th>Doubling share of renewable energy in global energy mix</th>
<th>Renewable energy share in Total Final Energy Consumption</th>
</tr>
</thead>
<tbody>
<tr>
<td>Percentage of population with electricity access</td>
<td>Percentage of population with access to modern cooking solutions</td>
<td>Rate of improvement in energy intensity</td>
<td>Power</td>
</tr>
<tr>
<td>&gt;75%</td>
<td>&gt;75%</td>
<td>-2.6% per year</td>
<td>&gt;50%</td>
</tr>
</tbody>
</table>
Breaking down the IP process

- Investment Needs
- New programs and their funding requirements
- Interventions Programmed that needs funding
- Specific Energy Sector Project
- Prospectus
- Funding Needs
- Risk assessment
- Risk management
SE4ALL – Particular Nature of the Tanzanian IP

• AA will be integrated into the government mid-term planning (MTP) process by incorporating them into the MEM Five-year Strategic Plan
• Once the Integration process is completed, the resulting IP(s) will comprise of an investment needs assessment, the resulting consolidated portfolios of opportunities and complete prospectuses
• This initial IP is presented as a consolidated portfolio and envisioned as a bridge into the MTP to outline current funding needs for
  – Technical assistance
  – Closing priority gaps in the REA prospectus,
  – Pipeline of opportunities aimed to accelerate base load power supply and grid expansion/densification.
SE4ALL – Tanzania IP Structure

• Single Consolidated Prospectus presenting
  – Investment Thesis
  – Investment Opportunities

• Investment Opportunities
  – Programme Support. This focuses on the immediate needs of MEM and the SE4ALL Secretariat in support of the implementation of the AA.
  – Project Investment Opportunities Associated to REA’s Prospectus. These are priority project that required funding to close current gaps in the implementation of the Prospectus.
  – Project Investment Opportunities Associated to Access to Modern Electricity Services. These are primarily focused on on-grid power generation and grid infrastructure.
The SE4ALL implementation

SE4ALL Secretariat

- Resource mobilization
- Local actions
- Communication and Engagement
- Monitoring, Evaluation and Reporting

Ongoing actions: Rural electrification program, EE in buildings, minigrids etc

Emerging actions: BEST, TREMIS, 5 YRS Programs, minigrids etc

New actions
• THANK YOU
